

The purpose of this file is to provide reporting assistance related to the Toxic Substances Control Act (TSCA) section 8(a)(7) reporting and recordkeeping rule for per- and polyfluoroalkyl substances (PFAS). Any entity who has manufactured a PFAS that is a TSCA chemical substance for commercial purposes in any year since January 1, 2011, is required to submit certain information to EPA. See 40 CFR 705.

For the purposes of this section 8(a)(7) rule, "PFAS" is defined as: any chemical substance or mixture containing a chemical substance that structurally contains at least one of the following three sub-structures:

- (1) R-(CF₂)-CF(R')R'', where both the CF₂ and CF moieties are saturated carbons.
- (2) R-CF₂O-CF₂-R', where R and R' can either be F, O, or saturated carbons.
- (3) CF₃C(CF₃)R'R'', where R' and R'' can either be F or saturated carbons.

Note that this rule defines PFAS using a structural definition. While EPA is providing this file to assist potentially affected entities with identifying reportable PFAS, manufacturers are advised that a chemical substance's omission from this list does not necessarily mean it is not reportable under this rule. EPA notes that some possible reasons that a TSCA chemical substance which meets this rule's PFAS definition include: (1) being exempt from other TSCA reporting or notification requirements (e.g., certain byproducts, impurities, R&D substances); (2) a substance whose identity (even a generic identity) EPA cannot currently reveal due to confidential business information (CBI) protections.

The "PFAS without CBI ID Claims" tab includes a list of PFAS on either the TSCA Inventory or submitted as a Low-Volume Exemption (LVE) claim, and whose specific identities are not confidential. A chemical substance is listed in the public portion of the Inventory by a specific chemical name (either a Chemical Abstracts (CA) Index Name or a CA Preferred Name) and a Chemical Abstracts Service (CAS) Registry Number if its identity is not confidential. This sheet includes the following columns:

- Chemical Name: Chemical name, as recorded on the TSCA Inventory (or an LVE claim)
- CAS Number: Chemical Abstracts Services Registry Number, where applicable

The "PFAS with CBI ID Claims" tab includes a list of PFAS on either the TSCA Inventory or submitted as an LVE claim, and whose specific identities are confidential. If a chemical's identity is confidential, it is listed in the public portion of the Inventory by a TSCA Accession Number and a generic chemical name that masks the specific substance identity; EPA cannot divulge those specific chemical names or their corresponding CAS numbers. This sheet includes the following columns:

- Generic Name: A structurally descriptive name of a chemical substance whose specific chemical identity is claimed as CBI
- Accession Number: TSCA Inventory identification number
- LVE Number: TSCA Low-Volume Exemption identification number

This list was last updated on May 16, 2024.

Update note for May 16, 2024: All non-CBI PFAS now have CAS numbers. There are no more non-CBI PFAS with only an LVE number for identification; thus, the "PFAS without CBI ID Claims" sheet no longer has the "LVE Number" column.
